

The Evolution of Inner-City Living

Tricor Development Corporation proudly presents The Mission Crossing! Located in the heart of the Cliff Bungalow/Mission community, these nine architecturally inspired, three-story townhomes offer a stunning exception to the typical inner-city home. Each home is a masterpiece of design and craftsmanship with an underground double-garage (concealed and private), a personal elevator in each home (serving all four levels), and breathtaking city views from private rooftop patios.

The Mission Crossing Townhomes inhabit one of Calgary's most thriving inner-city communities! Enjoy the numerous amenities, boutique shopping, eclectic dining and night life that only Mission can offer. Live in a busy and flourishing community but relax in the luxurious comfort of worry-free living, nestled in the quiet residential style of our 21st Avenue SW location. The Calgary downtown core is only a short walk away, as is the celebrated 4th Street and 17th Ave respectively. Proximity to the Elbow River and the surrounding park areas ensures that nature is also close at hand. Enjoy a relaxing stroll on the banks of the Elbow River within a few minutes' walk from your doorstep.

Relax in the comfortable expanse of your private roof-top terrace. Lavish in the glow of dusk as you gaze at the downtown skyline. Awaken to breathtaking views while you calmly sip your morning coffee. Smile and leave days of traffic snarls behind you, walking or biking to work in the core. Enjoy the residential feeling that can't be matched in a tall-tower and relax in the comfort of a historical neighborhood and community. Feel secure knowing that your home is virtually maintenance free, and has many other security and safety features unparalleled in other inner-city homes.

The Mission Crossing features floor plans which are designed with gracious living in mind. Unique layouts and thoughtful touches set The Mission Crossing apart from other townhomes.

Features will vary depending upon your choice of finish scheme (Contemporary or Transitional).

The Mission Crossing is not your typical townhome

The Mission Crossing has been designed to stand apart from the typical luxury townhome design. These ultra-modern luxury Town Homes have rich sophisticated finishes combined with clean distinctive lines. Natural color palettes including numerous accents and contrasts beautify the interior living spaces. Striking exterior architecture with extensive use of brick, chocolate-cigar acrylic stucco, black decorative railings and abundance of metal-clad windows, all unite, creating lavish homes with stunning sophistication and unparalleled urban beauty.

Compare Mission Crossing to other Townhomes:

- Heated **underground parking** with nine fully-enclosed, **private two-car garages**. As you enter the underground parkade the large security door closes behind you. Then your own double-garage door opens. As you park your vehicle you can relax knowing that your property and belongings are safe and secure in your personal underground garage.
- **Elegant private elevators, one for each home**. Access each of your four levels with convenience and ease. Go from your underground private garage to the third-floor master bedroom, all from a single touch of a button. Enjoy inner-city living with over 2400 square feet of living space without the burden or necessity of climbing numerous flights of stairs.
- Each home has its own expansive and **personal rooftop patio** with perimeter glass railing and stunning city views. Your own 'oasis in the sky' is nearly 500 square feet and comes equipped with power, water, natural gas and rooftop dual-drainage. These areas have been structurally engineered to support eight-person hot-tubs. Packages are available by request (ask us for more information). Wow!

Features will vary depending upon your choice of finish scheme (Contemporary or Transitional).

***Specifications may be altered without notice*

- Up to six outdoor areas are included with each home. Each home has a courtyard terrace with an outdoor gas fireplace and seating area. An entryway veranda, 2 or 3 balconies (depending upon choice of home) all topped off with a personal rooftop patio.

Every Home

- Has over 2400 square feet of interior living space equipped with sprinklers throughout, fire-protection warning systems, carbon monoxide detectors in the garage and parkade areas
- Is a three bedroom residence with expansive living and dining areas, two superbly equipped luxury bathrooms, a main floor powder-room, a spacious 2nd floor laundry room and basement storage and workshop space.
- Nine-foot ceilings, large metal-clad windows and flawless interior finishing add an extra-special dimension to these vibrant urban homes.
- Includes a fully heated, underground double garage. This is your own private, underground parking garage with an individual overhead door. Each garage is situated within a larger common parkade area. The parking area is accessed from the north lane via a heated ramp, with an electronic security call-box, and an exterior overhead door equipped with garage door opener. Residents are provided with two key fobs. This very unique, exclusive parking design promotes superior curb appeal as the exterior is not blemished with drive-up garage doors which can sometimes be an architectural eyesore. Mission Crossing provides an environment which is safe, secure, elegant and convenient.
- Is equipped with its own residential elevator (*Infinity* by Concord Lifts). Built with extravagance in mind, these elevators come with wood grain interior finishes, stainless steel rails, digital displays and user friendly control panels. Each is equipped with infrared safety sensors, door lock mechanisms and dedicated in-car phone support (monitored 7 by 24) for your safety and peace of mind. Each elevator is capable of four stops (basement & parking level, main, second and third floor).

Features will vary depending upon your choice of finish scheme (Contemporary or Transitional).

***Specifications may be altered without notice*

- Central Air Conditioning
- High-Efficiency forced air furnace systems (Carrier) with high efficiency Hot Water tank
